

Peladon Software Signs Reseller Agreement with ECS Imaging

ECS Imaging to market Peladon's DocXP™ document capture product suite to Laserfiche® base of clients

SAN DIEGO, Calif., June 20, 2008 – Peladon Software, a prominent developer of automated capture and document processing solutions, today announced that ECS Imaging, Inc. has signed an agreement to resell Peladon's complete line of DocXP™ products.

ECS Imaging is a leading Laserfiche® authorized value-added reseller (VAR), providing electronic document management solutions to a variety of markets, most notably city and local governments, law enforcement and education, throughout the state of California. ECS Imaging plans to resell Peladon Software's complete line of DocXP™ products to their clients needing an automated document processing, data capture, and redaction solution.

Peladon Software is the supplier of an extensive line of document processing systems and automated data capture solutions, including the DocXP™ document classification, data security, redaction, data extraction and verification software software for the healthcare, banking & finance, education, legal, retail, insurance and government markets.

"The DocXP™ suite complements the Laserfiche® document management system perfectly. Many of our clients have been asking for an automated document capture solution that will work with their document management system. This is a great opportunity for our installed base to further improve their business processes and enhance operational efficiencies," said ECS Imaging's founder and president, Jim Pappas. "Our government and law enforcement clients will benefit greatly from DocXP™'s auto-redaction capability. Municipalities can use this tool to accurately and automatically remove sensitive data from publicly available documents, thereby protecting the personal information (e.g., social security numbers, home addresses) of employees and preventing identity theft," added Pappas.

"ECS Imaging is one of the top Laserfiche® VARs in the nation," said Noel Flynn, Chief Operating Officer of Peladon Software. "We are thrilled to be associated with a company that has such a great track record and a strong customer-driven philosophy. I believe our partnership will provide many new opportunities for both companies, with the greatest benefits derived by ECS Imaging's customers," added Flynn.
