

Peladon Software Signs Partnership Agreement with EntComm

EntComm to Resell Peladon Software's DocXP™ Data Capture Suite

SAN DIEGO, Calif., December 19, 2007 – Peladon Software, a prominent developer of automated capture and document processing solutions, today announced that EntComm, Inc. has signed an agreement to resell Peladon's DocXP™ product suite.

EntComm is the developer of the Resonance Suite™, an integrated application and infrastructure solution designed to automate and extend supply chain and fulfillment processes within the Oil and Gas, Aerospace and Defense, and Manufacturing industries. EntComm plans to resell Peladon Software's DocXP™ suite within these industries, as a part of their solutions, to their clients needing an automated document processing and data capture solution.

Peladon Software is the supplier of an extensive line of document processing systems and automated information capture solutions, including the DocXP™ document classification, data security, data extraction and verification software modules.

"EntComm is a prominent enterprise solution provider and integrator specializing in applications that improve operational efficiencies, eliminate redundancy and waste, while increasing responsiveness," said Noel Flynn, Chief Operating Officer of Peladon Software. "Our products provide many of the same benefits, but within the more focused area of automated document processing. We believe this partnership is a fantastic fit and will benefit many end-users within the Fortune 500 and beyond," added Flynn.

"Peladon Software's DocXP™ solution is the best automated document processing and data capture solutions that we have seen in the industry," said G. Satish, Chief Operating Officer of EntComm. "We believe that the benefits our customers derive from our solutions will be further enhanced with the addition of DocXP to our solution set. Our customers are the true winners in this partnership," added Satish.
