Dental Practice Management Company Selects Peladon to Automate EOB's

SAN DIEGO, Calif. Feb 4th, 2010 – Peladon Software, a prominent developer of automated capture and document processing solutions, today announced that a \$500 million leading dental practice management company that provides services to 300 dental offices across the nation has signed an agreement to automate their entire Explanation of Benefits (EOB) Processing system using Peladon's DocXP™ EOB product.

The dental practice management services company provides comprehensive business support services, personnel, facilities and equipment to dental groups in the US. The company was founded in 1998 has affiliated practices that are typically found in high-traffic retail areas and offer general, specialty, and cosmetic dentistry. The company supports its dental practices with administrative and technical services such as accounting and information technology. With almost 300 affiliated offices, they have developed substantial expertise in providing business support services to dentists, who have likewise enjoyed growth and success in their practices.

"The healthcare industry is beginning to adopt document imaging technology to reduce their labor costs and using this technology to improve their operating margins," says Noel Flynn, Chief Operating Officer of Peladon Software. "Our technology delivers on these objectives by eliminating expensive manual data entry, improving productivity, eliminating costly errors and increasing visibility," added Flynn.

Peladon Software is the supplier of an extensive line of document processing systems and automated information capture solutions. DocXP™ EOB is a highly sophisticated document capture solution specifically designed to automate the processing of EOB forms. After countless hours of collaboration with healthcare service professionals, DocXP™ EOB was engineered keeping in mind the unique business processes and workflow of medical providers and healthcare organizations. DocXP™ EOB is a flexible, customizable data capture solution to meet the needs of medical providers – large and small. It allows medical providers to quickly and accurately capture data from EOB forms, validate the information and balance individual patient claim totals and EOB totals to the accompanying check.
