There is a very close, complementary fit with DocXP and EASY's technologies

Bury St Edmunds, UK – January 4th , 2011 – EASY SOFTWARE UK, Europe's foremost supplier of integrated document management, workflow and archive solutions, has today announced that it has signed a strategic partnership agreement with Peladon Software, a prominent developer of document processing and automated information capture solutions.

Peladon Software develops and markets an extensive line of automated document processing and data capture solutions, including the DocXP™ document classification, automated redaction, data extraction and data verification software modules for the healthcare, banking and finance, education, legal, retail, insurance and government markets.

The new partnership will enable both companies to capitalize on their respective strengths in electronic document management and information capture technologies and take advantage of joint market opportunities. "There is a very close, complementary fit with DocXP and EASY's technologies particularly for invoice capture and management applications and we are looking forward to exploiting this synergy and adding more strings to our bows as the partnership matures," added Howard Frear, EASY's director of sales and marketing.

EASY Enterprise.x is EASY SOFTWARE's flagship archive, document management and business process management platform. Delivering exceptional functionality, Enterprise.x is a truly scalable, platform-independent solution that offers load-balancing and high availability and has been designed so that it requires minimal administration and is built to handle huge amounts of documents.

David Carr, Peladon's sales director added, "EASY has an unrivalled reputation for scalable, high quality, robust document management technologies that are used by thousands of organizations globally. We are delighted to add our data capture capabilities to EASY's portfolio of products and extend our reach into broader business opportunities that require more extensive document technologies."
