### **Peladon and eGistics Win Multi-Year Contract to Deliver Information Management System to National Healthcare Organization**

**DALLAS and SAN DIEGO, July 26, 2010** - eGistics, Inc., ([www.egisticsinc.com](http://www.egisticsinc.com)) a leading provider of hosted information management solutions, and Peladon Software, a provider of complex document capture and data conversion software, today announced that they have won a significant multi-year contract to jointly deliver an information management solution to a national healthcare services organization. Today's announcement reaffirms the value of using the combined eGistics-Peladon solution to automate document-driven business processes. eGistics will implement Peladon's data capture and conversion technology along with the eGistics hosted information management platform that provides an information archive with real-time retrieval functionality. Peladon will enable the healthcare services organization to quickly and accurately convert captured documents to electronic transactions, validate the information, balance to batch totals, and reconcile transactions automatically. eGistics will store images of the original documents and the converted data along with other customer data and computer reports in a highly secure, online archive. The combination of eGistics' hosted framework and Peladon's technology provides the healthcare organization with unique benefits for automating document-driven business processes, including reduced costs, increased efficiency, and enhanced customer service -- all while maintaining regulatory compliance.

"This major contract win validates our efforts in continuing to expand our business in the healthcare market place and demonstrates our value as a hosted solution," said Noel Flynn, chief executive officer at Peladon Software. "We are excited at having such a strong business relationship with a company like eGistics, and look forward to continued success."

"Despite the push towards electrification, most organizations are still overrun with paper. Together, eGistics and Peladon deliver solutions that digitize paper workflows to support business processes, enable collaboration, and streamline compliance and continuity planning," said eGistics Executive Vice President Gary Provo. "These solutions eliminate the costly and error-prone keying of large volumes of critical information, providing a compelling return on investment at a time when companies are more cost conscious than ever."

#### **About Peladon Software**

Peladon Software, a wholly owned division of Data & Research Services PLC, provides automated data capture solutions for the Banking, Insurance, Financial, Healthcare, Legal, Education, Retail and Government markets. The company develops and markets an extensive line of document processing products, including the DocXP™ document classification, automated redaction, data extraction and data verification software modules. Peladon's products, combined with expert services, allow companies across the globe to reduce operating costs, obtain higher information accuracy and speed processing times. Using Peladon's solutions, clients become more efficient and competitive, allowing better, faster decision making. With the depth and strength of a parent company such as DRS, a market leader in the data capture arena for more than 35 years, Peladon offers the finest automated data capture technology, combined with world class customer support.
