**Hyland Software and Peladon Software to enter partnership
and offer document processing solutions**

*-- Two software companies combine resources to create powerful solutions for the
document processing industry --*

July 3, 2007, San Diego, CA and Cleveland, Ohio, – Peladon Software, a known developer of automated capture and document processing systems and Hyland Software, creator of popular enterprise content management solutions, announced a partnership. The partnership agreement calls for a broad cooperation of two companies in development and distribution of information processing systems. Both companies will be able to offer their customers a complete line of integrated document and content management software to automate management of information in various vertical markets such as financial services, government, healthcare, education, insurance, etc.

In evaluating various partners, Hyland and Peladon have concluded that the synergy between the two companies, the strength of their present product lines and the potential for the joint market presence are compelling reasons for entering into a partnership.

“We are very pleased to join Hyland as a partner in the rapidly expanding enterprise content management market. We are positive that both companies will derive substantial benefits from this effort,” said Noel Flynn, chief operating officer of Peladon Software. “We are in the process of adding a number of new powerful features and enhancements to our flagship product DocXP in anticipation of seamless integration with Hyland OnBase,” he continued.

About Peladon Software

Peladon Software Inc, a wholly owned division of Data & Research Services PLC, provides automated data capture solutions for the banking, insurance, financial and government markets. Peladon’s products, combined with expert services, allow companies across the globe to reduce operating costs, obtain higher information accuracy and speed processing times. Using Peladon’s solutions, clients become more efficient and competitive, allowing better, faster decision making.

With the depth and strength of a parent company such as DRS, a market leader in the data capture arena for more than 35 years, Peladon offers the finest automated data capture technology, combined with world class customer support.
