

## **Peladon Software Signs Reseller Agreement with eDocSecure**

*eDocSecure to resell complete line of DocXP™ document capture solutions*

**SAN DIEGO, Calif., April 17, 2008 – Peladon Software**, a prominent developer of automated capture and document processing solutions, today announced that eDocSecure, Inc. has signed an agreement to resell Peladon's entire DocXP™ product suite.

eDocSecure is a leading provider of enterprise content management software solutions that empowers companies with the tools to automate document-centric business processes. eDocSecure plans to resell Peladon Software's complete line of DocXP™ products to their clients within the healthcare and government markets that need an automated document processing, data capture, redaction and Explanation of Benefits (EOB) solution.

Peladon Software is the supplier of an extensive line of document processing systems and automated information capture solutions, including the DocXP™ document classification, data security, redaction, data extraction and verification software modules for the healthcare, banking & finance, education, legal, retail, insurance and government markets.

"The DocXP™ suite is the perfect complement to our content management software solutions. Many of our clients need automated document capture products to streamline their business processes and accelerate operational efficiencies," said John Hughes, President and CEO of eDocSecure. "We see a particular need within police departments for the auto-redaction capability that DocXP™ provides. Municipalities can use this tool to accurately and automatically remove sensitive data from publicly available documents, thereby protecting the personal information (e.g., social security numbers, home addresses) of employees and preventing identity theft," added Hughes.

"eDocSecure provides innovative products and services to help companies increase productivity and efficiency by improving business processes and implementing enterprise content management solutions," said Noel Flynn, Chief Operating Officer of Peladon Software. "I believe our partnership will provide a new opportunity for the future growth of both companies and vastly benefit eDocSecure's many customers," added Flynn.
